

**ENVIRONMENTAL**  
— JUSTICE LEAGUE —

September 2, 2022

The Honorable Gavin Newsom  
Governor  
State of California  
State Capitol  
Sacramento, California

**RE: Request for Signature  
SB 1075 (Skinner) Green Hydrogen: Emissions of Greenhouse Gases**

Dear Governor Newsom:

On behalf of the California Environmental Justice League, I respectfully request your signature on Senate Bill 1075 (Skinner).

This bill will require the California Air Resources Board (CARB), the California Public Utilities Commission (CPUC), and the California Energy Commission (CEC) to incorporate hydrogen into its decarbonization strategies, including requiring the CEC to develop a definition for “renewable hydrogen.”

This is a progressive and much needed measure to move the needle on developing clean fuels and addressing harmful emissions in California. The Environmental Justice League strongly supports the expansion of electric along with measures to significantly reduce diesel emissions, but we also believe that California should be aggressively investing in and developing clean fuels such as green hydrogen as an integral and parallel strategy to reduce harmful emissions and combat global warming.

Our communities need emissions reductions now, and they can't wait.

Sincerely,

Tim Cromartie  
Policy Director
